Winter 2023

Scandinavian Home Comfort

Mill heating is Scandinavian design at its best. Designed in Norway, Mill heaters blend minimalistic curved shapes, a contemporary flair, and leading industry technology to create energy efficient warmth and comfort to your home when you need it.

Mill's product series range

Smart Heater Series

Mill is now launching its user-friendly smart heaters with cutting edge technology to ensure everyday comfort and energy saving.

Panel Heater Series

Mill Panel heaters provide a comfortable base temperature throughout your home. Choose from 12 models ranging from 600 watt to 2000 watt (Ideal wattage is 70 – 100 watts per square metre) for your optimum temperature.

Oil Filled Heater Series

If you are looking for a gentle heating source that does not dry the air, a Mill oil filled radiator is the perfect choice.

Fan Heater Series

Mill Fan Heaters provide powerful performance to quickly heat up larger rooms. They burn less dust and won't dry the air like regular fan heaters. Their compact size allows for easy storage.

Air Quality Series

Effective and silent air purifiers that cleans the air of pollen, odors, viruses, toxins and harmful gases. Enjoy clean and pollen-free air at home.

Convection Heater Series

Mill Convection is a range of highly efficient heaters that provide instant heat as soon as they are turned on.

Available at Bunnings

Our smart-home integrations enable a seamless user experience, and gives you time to focus on the important parts of life. We call it comfort, the Scandinavian way.

Mill Smart Heaters

Control your heating with the Mill app from anywhere

Did you know that with the Mill Norway app you can control your Mill heater from anywhere? The Mill heater connects to your Wi-Fi network automatically via Bluetooth, allowing you to easily adjust the temperature to suit your daily routine. The Mill Norway app benefits the environment by helping to reduce power consumption, and benefits you by lowering your power bill. Set up weekly programs, automatically adjust room temperature to your customised settings. Modes include Comfort, Sleep, Away and Off. At Mill, we believe you should not have to compromise comfort when making smart choices.

Easy to install, Simple to use

The Mill Norway app is freely available from Google Play and the App Store and operates from your smart device. Easy to install – simply download, follow the set-up prompts then start using. Featuring a highly intuitive interface that offers heat setting and measuring capabilities, the Mill App allows you to easily switch between multiple locations and share your account with family members. Add multiple heaters and devices or remain in control by enabling the child lock and temperature regulator. View power consumption and temperature by room, by heater.

Energy Efficient Heating

With Mill Wi-Fi integrated heaters and the Mill Norway app, you can lower your power consumption while enjoying a perfectly heated and comfortable home. Tailor the temperature to your own requirements, set schedules that allow you to optimise your heater performance whether at home or away. The new power consumption statistics allow you to monitor your heating pattern over time, giving you full control of your power use so you can reduce your power consumption.

Mill app is only compatible with Wifi enabled heaters.

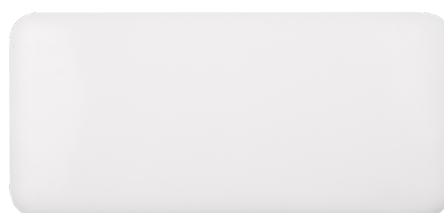

Available for iOS (Version 8 or newer) and Android (version 4.2 or newer) devices.
